Canon

EN Magnetic Photo Paper MG-101

Thank you for purchasing Canon Magnetic Photo Paper. Please read the following information before use.

Printing Precautions

- Select Glossy Photo Paper as the media type.
- Print on the glossy (white) side. You cannot print on the magnetic (black) side.
- If the Magnetic Photo Paper is curled, straighten it before printing.
- Load Magnetic Photo Paper in the cassette or rear tray one sheet at a time.
- Remove each sheet from the output tray. Letting the sheets pile up may dirty the printing surface.

Handling Precautions

- Use this paper in a normal room temperature environment (15 to 25°C, 40 to 60%).
- A thin protective sheet is included between the sheets of Magnetic Photo Paper to prevent abrasion. Remove this sheet when you remove the paper from the package.
- Remove only the required amount of Magnetic Photo Paper from the package. Store unused sheets in the package in a cool, dry place out of direct sunlight.
- Do not cut the Magnetic Photo Paper sheets before printing.
- Hold Magnetic Photo Paper sheets by the edges to avoid leaving scratches or fingerprints on the printing (glossy) surface. Scratches or other blemishes will impair the print quality.
- If you trim the Magnetic Photo Paper after printing, the paper may not cut cleanly.
- If printed Magnetic Photo Paper is left outside for long periods of time, or if the paper gets wet, this may cause discoloration, curling or loss of magnetism.

Warning

This product emits low level magnetic flux. If you use a cardiac pacemaker and feel abnormalities, please move away from this product and consult your doctor.
