

CUT AS SHOWN ON THE BACK TO SEE THE CALCULATION EXAMPLE AND IMPORTANT NOTES INSIDE THE BOX.

POWER SUPPLY

This calculator comes with an alkaline power source. Generally, under normal room lighting, the calculator is powered by a built-in solar cell. When the light level drops below a certain point, it will automatically switch over to battery power. The alkaline battery is long lasting however the battery life will depend on usage. When the battery is exhausted, you can still use the solar cell to power the calculator. (Note: Do not attempt to change the battery. Please have a Canon Service Center technician change the battery.)

- Electromagnetic interference or electrostatic discharge may cause the display to malfunction or the contents of the memory to be lost or altered. Should this occur, press the ON key and re-start your calculation from the beginning.

OVERFLOW FUNCTIONS

In the following case, "E" will be shown on the display. The keyboard is electronically locked, and further operation is impossible. Press ON to clear the overflow. The overflow occurs when:

- The result or the memory content exceeds 8 digits to the left of the decimal point.
- Dividing by "0".

SPECIFICATION

Power Source: Please refer to the product backside.

Automatic power-off function: Approx. 8 minutes

Usable Temperature: 0°C to 40°C (32°F to 104°F)

Dimensions: 97mm (L) x 60mm (W) x 11.4mm (H) /

3-13/16" (L) x 2-3/8" (W) x 29/64" (H)

Weight: 41g (1.45oz)

(Subject to change without notices)

CANON ELECTRONIC BUSINESS MACHINES (H.K.) CO., LTD.
